EXPERIENCE

Robowaves (Test Yantra Software Solutions Pvt. Ltd.) | Front-end Developer Intern

Aug 2025 – Present

- Designed and optimized 20+ responsive UI components for a college portal and e-learning marketplace, translating Figma prototypes into scalable React.js and Tailwind CSS code.
- Guided front-end team tasks in an Agile (SDLC) environment, including sprint planning, code reviews, and overseeing Git/GitHub version control and branching.

PROJECTS

Sylla Bridge | *Academic Workflow Platform*

- Initiated, co-led, and architected a comprehensive academic platform—now in pilot testing for college adoption—that digitizes workflows via role-based dashboards to streamline communication and data management for students, faculty, and admin.

Mind Lift | ***Two-Sided Course Platform***

- Contributed to a digital marketplace connecting students with courses, enabling instructors to sell and manage their educational content.

Terra | ***E-Commerce & Consultation Platform***

- Conceptualized and developed the user-facing front-end (React.js) from Figma prototypes for a multi-service platform for pet/plant e-commerce and bookable veterinary consultations.
- Integrated back-end APIs to display personalized, AI-generated product suggestions.

Real-Time Text Translator | ***React-based Utility***

- Built a dynamic text translation tool using React and Tailwind CSS, integrating a live API to provide instant multilingual communication capabilities.

Apple Website Clone | ***Front-End Project***

- Constructed a high-fidelity, responsive clone of the official Apple website (95%+ accuracy) using pure HTML, CSS, and JavaScript.
